[REDACTED],

Your SEVIS record is back in an “active” status! There was a message out on the listserv I mentioned earlier

“PSA to check your student records who were terminated in this ICE/SEVP situation because we were alerted by an impacted student that he had heard that records were being activated. Lo and behold, it was true. It is still only a small % of our impacted records but it is good news (I hope). I will be checking again in the morning to see if more have changed status. In the SEVIS event history it is listed as a “Manual Data Change”.”

Your was one of those put back to an “active” status.
